

CAD Specialist

Job Title: CAD Specialist

Location: Delhi

Experience: 2-5 Yrs

Role Overview

We are seeking a **CAD Specialist** with 2-5 years of experience in computer-aided design to support us in our project. The role involves creating, updating, and maintaining CAD drawings while collaborating with the project team to ensure design accuracy and compliance with project standards.

Key Responsibilities

- Develop and revise CAD drawings based on project requirements and team inputs.
- Collaborate with engineers and other stakeholders to understand design objectives and requirements.
- Ensure CAD drawings are precise, meet project standards, and comply with relevant codes.
- Maintain an organized repository of CAD files and ensure version control.
- Conduct adjustments and corrections to existing drawings as requested.
- Assist in preparing basic design documentation when needed.

Qualifications

- 2–5 years of professional experience working with **AutoCAD** or other CAD software.
- Certificate or diploma in **Drafting, Engineering**, or a related field.
- Strong attention to detail and knowledge of standard design practices.
- Ability to interpret technical sketches and convert them into CAD designs.
- Good organizational skills for file management and version control.
- Basic understanding of engineering or architectural concepts is a plus.

Preferred Skills

- Experience with airport or infrastructure projects is an advantage.
- Exposure to collaborative environments involving engineers and project teams.
- Willingness to adapt to project-specific tools or practices.
