

Packager Manager – ELV

Position: ELV Manager

Location: – Delhi

Experience: 5-7 Yrs

Role and Responsibilities:

1. System Integration and Deployment:

- Lead the integration and deployment efforts for a range of ELV, inbuilding, and security systems, including Closed-Circuit Television (CCTV), Access Control Systems (ACS), Public Address Systems (PAS), Fire Alarm Systems (FAS), Building Management Systems (BMS), Mobile Radio Systems, IP-based Video Surveillance (IPYV), and Master Clock Systems.
- Coordinate with vendors, contractors, and internal teams to ensure seamless integration and interoperability of systems across the airport infrastructure.

2. Project Planning and Management:

- Develop comprehensive project plans, including timelines, resource allocation, and budgetary considerations, for ELV, inbuilding, and security system projects.
- Monitor project progress, identify potential risks or obstacles, and implement mitigation strategies to ensure timely completion of deliverables.

3. Stakeholder Engagement:

- Serve as the primary point of contact for stakeholders involved in ELV, inbuilding, and security system projects, including airport management, regulatory agencies, airlines, and other relevant parties.
- Facilitate effective communication and collaboration among stakeholders to address concerns, provide regular updates, and ensure alignment with project goals.

4. Quality Assurance and Compliance:

- Implement quality assurance measures to ensure that ELV, inbuilding, and security systems meet industry standards, regulatory requirements, and airport-specific security protocols.
- Conduct regular inspections, audits, and testing procedures to verify system functionality, reliability, and compliance with established guidelines.

5. Training and Support:

- Develop training programs and materials to educate airport staff and personnel on the proper use, maintenance, and troubleshooting of ELV, inbuilding, and security systems.
- Provide ongoing support and assistance to end-users, technical teams, and maintenance personnel to address system-related issues and ensure optimal performance.

Qualifications:

- Bachelor's degree in electrical engineering, Computer Science, or a related field. Advanced degree or relevant certifications preferred.

- Min 5 years proven experience in project management and implementation of ELV, inbuilding, and security systems, preferably within the aviation or critical infrastructure sector.
- In-depth knowledge of electronic security systems, including CCTV, ACS, PAS, FAS, BMS, and related technologies.
- Familiarity with telecommunications infrastructure, including mobile radio systems and IP-based communication networks.
- Strong analytical skills, with the ability to assess complex technical requirements, identify solutions, and drive implementation efforts to completion.
- Excellent communication and interpersonal skills, with the ability to interact effectively with diverse stakeholders, including technical teams, vendors, and senior management.
- Demonstrated leadership abilities, including the capacity to lead cross-functional teams, manage multiple projects simultaneously, and deliver results in a fast-paced environment.
