MSI (Master System Integrator) Lead

Position : Master System Integrator (MSI) Lead
Location: On-Site out of India
Employment Type: Full-Time

Job Summary
We are looking for a dynamic **Master System Integrator (MSI) Lead** to oversee the successful delivery of the Crete Airport project. This senior-level role will serve as the Project Lead, responsible for managing the integration of multiple systems, ensuring alignment with client objectives, and driving the project to meet the defined milestones. The ideal candidate will possess extensive experience in systems integration, project management, and leadership in large-scale airport infrastructure projects.

Key Responsibilities
  i. **Project Leadership and Management:**
       o Oversee all aspects of the project, ensuring timely delivery of milestones defined for the project.
       o Act as the primary liaison between the client, internal teams, and external stakeholders.
  ii. **Systems Integration Oversight:**
       o Lead the end-to-end integration of airport systems, including PPS, AOS, FIDS, ELV, IT Infrastructure, and communication systems.
       o Ensure interoperability and seamless functionality across all systems.
  iii. **Stakeholder Engagement:**
       o Manage communications and expectations with all stakeholders, including client, vendors, and subcontractors.
       o Facilitate collaboration among cross-functional teams, ensuring alignment with project objectives.
  iv. **Resource and Team Management:**
       o Lead a diverse team of technical and functional experts, including project coordinators, SMEs, developers, and testers.
       o Allocate resources efficiently to meet project demands and milestones.
  v. **Risk and Issue Management:**
       o Identify potential risks, develop mitigation strategies, and address issues proactively.
       o Maintain strict adherence to quality and safety standards throughout the project lifecycle.
  vi. **Progress Monitoring and Reporting:**
       o Monitor project progress and provide regular updates to stakeholders and senior management.
       o Prepare comprehensive reports, including status updates, risk assessments, and completion metrics.
  vii. **Quality Assurance and Testing:**
       o Oversee ITF implementation and ensure rigorous testing of all systems.
       o Validate that all integrations meet defined performance and reliability standards before deployment.

Required Qualifications and Skills
  • **Education:** Bachelor's or Master's degree in Engineering, IT, Project Management, or a related field.
  • **Experience:**

- 12–18 years of experience in system integration and project management, very much preferred in airport systems or large-scale infrastructure projects.
- Proven experience in delivering complex projects involving multiple vendors and stakeholders.
- **Certifications:** PMP, PRINCE2, or equivalent project management certification is highly desirable.
- **Technical Expertise:**
  - Strong knowledge of almost all airport systems such as AODB, IT infrastructure, ELV systems, and communication technologies.
  - Hands-on experience with system integration, testing, and commissioning.
- **Skills:**
  - Exceptional leadership and organizational skills.
  - Excellent communication and interpersonal abilities.
  - Proficiency in project management tools (e.g., MS Project, Primavera).
  - Ability to manage multi-disciplinary teams in a high-pressure environment.
  - Fluency in English; knowledge of Greek is a plus.

Additional Information

- The role is based mostly on-site in outside India, and requires close collaboration with all stakeholders.
