Job Description – Product Manager

Position: Product Manager

Location: Delhi NCR

Experience: 4-5 Yrs

We are looking for Product Manager for our Technology Product who will be responsible for the product planning and execution throughout the Product Lifecycle, including gathering and prioritizing product and customer requirements, defining the product vision, and working closely with engineering, sales, marketing and support to ensure revenue and customer satisfaction goals are met. The Product Manager's job also includes ensuring that the product supports the company's overall strategy and goals.

Roles and Responsibilities:
- Define and execute the product vision, strategy, and roadmap aligned with business goals
- Work with business stakeholders to identify, define and capture all Business Requirements further to draft all functional and non-functional requirements.
- Conduct market research, competitive analysis, and customer feedback to identify opportunities and trends.
- Collaborate with Technology Developers Team to define product requirements and ensure timely delivery.
- Prioritize features, enhancements, and bug fixes based on business impact and customer needs.
- Act as the primary point of contact between internal teams, clients, and partners for product-related updates.

Requirements:
- Minimum of 4-5 years experience in the Technology product development space
- Strong understanding of software development processes and Agile methodologies.
- Demonstrated success defining and launching excellent products
- Business Analysis and Understanding of Techno-functional flows
- Excellent written and verbal communication skills
- Bachelor's degree in Computer Science, Engineering, Business, or related field (MBA preferred).
- Technical background, with experience in 3 years
- Excellent teamwork skills
- Proven ability to influence cross-functional teams without formal authority
- Examples and at least one sample of an effective document delivered in the past
